

Patent [19]

[11] Patent Number: 2001029721

[45] Date of Patent: Feb. 06, 2001

[54] AIR CLEANER

[21] Appl. No.: 11203850 JP11203850 JP

[22] Filed: Jul. 16, 1999

[51] Int. Cl.⁷ B01D04642 ; B60H00306

[57] ABSTRACT

PROBLEM TO BE SOLVED: To effectively utilize ultraviolet rays from an ultraviolet lamp and to suppress the contamination and damage of the ultraviolet lamp or a lamp protecting member at a time of the replacement of a dust collecting filter.

SOLUTION: A reticulated member 23 having the protective member, 6 of an ultraviolet lamp 5 and a housing 6 integrally formed therein is provided between the dust collecting filter 3 and photocatalyst filter 4 housed in the housing 2. The meshes of the reticulated member 23 are made as fine as possible so as to have a size not generating the pressure loss of air. By this constitution, the damage or contamination of the ultraviolet lamp 5 at a time of the replacement of the dust collecting filter 3 is suppressed and the strength of the housing itself is enhanced.
